

PRESS RELEASE

05/16/2018

Notification Regarding Cancellation of Emergency Water Conservation Measures

The Town of Southern Pines is pleased to announce that the main Finished Water Pump failure that was responsible for Water Conservation Measures being implemented 05/11/2018 has been repaired. The Water System is back to operating at full capacity and customers are welcome to return to normal usage and activities.

Southern Pines Utilities thanks its customers, both direct and bulk contract purchasers, for their cooperation over the past five days. With the assistance of our contracted operators Suez, and Williams Electric Motor Repair of Sanford, we have been able to expedite necessary repairs and return to standard operations. The patience, understanding, and commitment of all involved is truly appreciated.

Reagan D. Parsons
Southern Pines Town Manager
