

Water Main Work Continues

The Town of Southern Pines will continue work on the water transmission lines under Highway 1 Tuesday, March 12 and Saturday, March 16.

Tuesday's work will happen overnight starting at 9pm Tuesday and continuing through Wednesday at 3am.

The work on Saturday will take place during the day and residents are being asked to limit unnecessary water use during the day. The work, originally scheduled for last Saturday, was postponed due to the high amount of rain.

The water main at US Highway 1 and Poplar Street will undergo necessary maintenance and line extension work by DOT contractors. The water main at US Highway 1 and Poplar Street will be shut down Tuesday night and Saturday during the day. During this time the Town will supply water from our elevated water storage facilities. While we do not anticipate any issues, your help in conserving water during this time will help ensure water pressure remains sufficient for critical needs.

Thank you for your consideration of this voluntary request. If you have any questions, you may call the Town of Southern Pines Utilities at 910-692-1983 during normal business hours.
